Projects

2024

Student Cart e-commerce website

Developed and hosted a Student Cart e-commerce website using Django, featuring user authentication, product listings, a shopping cart, and secure payment processing. The application is deployed on Hostinger and includes a responsive design for an optimal user experience across devices.

2024

Naan Mudhalvan Upskilling Platform

Led development of a youth-focused upskilling platform in Django and Vue.js. Contributed to design, development, and deployment phases for seamless functionality. Empowered Tamil Nadu's youth with industry-relevant skills.

2023

Crowd Funding And Charity Application

Crowdfunding, facilitated by platforms like Flutter and Firebase, revolutionizes fundraising. Integrating Flutter's cross-platform capabilities and Firebase's backend services enables global fundraising with diverse income streams.

2022

Laravel Blog Website

I successfully completed a Laravel blog project, demonstrating my proficiency in web development using PHP and Laravel framework. Implemented features such as user authentication, CRUD operations, and responsive design, resulting in a fully functional and visually appealing blog website.

2021

Bitcoin prediction using AI and ML

In this project, we investigated machine learning techniques based upon sample characteristics of sample and dimension to predict Bitcoin price. Bitcoin is the most widely used digital currency, driven by the ease of transaction and the incentives to mine
